Experience

ENTUR AS | Customer Consultant

2025 – September 2026 | Norway

- ➔ Customer consultant at Entur AS, Norway's national travel planner and ticketing platform, handling customer inquiries and support for the Norwegian Railway system.

LILLEHAMMER TAXISENTRAL AS | Transport Coordinator

2023 – Juli 2026 | Norway

- ➔ Work primarily nights and weekends as a transport coordinator and customer handler, managing ride dispatch and real-time logistics.
- ➔ Problem-solving, customer service, and systematic workflow are central to the role.

BURGER KING & NORSTAT | Service Worker / Data Collector

2020 – 2023 | Norway

- ➔ Service worker at Burger King coordinating kitchen operations; data collector at Norstat conducting structured telephone interviews for market research.

Projects

LOYVETMITT.NO | Next.js, TypeScript, PostgreSQL, SaaS

2026 – Present | loyvetmitt.no | via Mash Partners

- ➔ SaaS platform for Norwegian taxi license owners that automates driver salary calculation by parsing uploaded Excel trip-data files.
- ➔ Full-stack monorepo with Next.js frontend, Fastify REST API, PostgreSQL, BullMQ workers, Stripe subscriptions, and role-based multi-tenancy.
- ➔ Built end-to-end as lead developer and designer within Mash Partners.

MASH PARTNERS | Full Stack, Web Development

2025 – Present | mashpartners.no

- ➔ Co-founder and lead developer responsible for planning and delivering tailored web solutions and automation projects for clients.
- ➔ Particular focus on automation tasks that streamline customer workflows and business processes.

BUYPASS – AUTOMATED CP/CPS MAINTENANCE | Python, GitLab, CI/CD - DevOps

Bachelor Thesis | 2025

- ➔ Developed a DevOps solution for automated maintenance of certificate policy and practice (CP/CPS) documentation at Buypass.
- ➔ Built with Python scripting and GitLab CI/CD pipelines for structuring and validating documents against compliance requirements and standards.

MYBOARD – MULTIPLAYER CHESS | C++, Firebase, Bash

2024

- ➔ Developed a C++ chess game engine with customizable boards and pieces, enabling real-time multiplayer play via Firebase in a VM environment.
